

2014 Greenhouse gas emissions reported to the Oregon Department of Environmental Quality and Lane Regional Air Protection Agency by facilities holding air quality permits.

The following emissions information was reported under Oregon’s greenhouse gas reporting requirements for facilities with an air quality permit that emit over 2,500 metric tons of carbon dioxide equivalent (MtCO₂e)¹. This document reflects each facility’s direct emissions that occurred during the 2014 calendar year.

Source ID²	Company Name	Biogenic³ emissions (MtCO₂e)	Anthropogenic⁴ emissions (MtCO₂e)	Total⁵ emissions (MtCO₂e)	County	Industry Type⁶
01-0029	Ash Grove Cement Company	0	694,409	694,409	Baker	Cement Manufacturing

Total Emissions:		6,587,339	12,509,791	19,098,103		

Notes:

- 1) MtCO₂e stands for total metric tons of carbon dioxide equivalent.
- 2) Source ID is the six digit identification number held by facility's in DEQ's air quality division.
- 3) Biogenic emissions include CO₂ resulting from the combustion of biomass or from an industrial process involving biomass.
- 4) Anthropogenic emissions include all non-biogenic emissions, such as emissions from the combustion of natural gas, coal, and fuel oil as well as industrial process emissions.
- 5) Total emissions include direct emissions as the sum of biogenic emissions and anthropogenic emissions in metric tons of carbon dioxide equivalent (MtCO₂e)
- 6) The industry types listed are the North American Industrial Classification System (NAICS) codes in each facility's air quality permit. Some facilities have one or more secondary classification not listed in this table.
- 7) Lane county facilities data provided by Lane Regional Air Protection Agency (LRAPA).
